SHADOWPATH ? NEXUS Evidence Report
Case: Local controlled smoke fixture (case_082b79affcf74907aa0878f2b848bc83)
APK: controlled_static_fixture.apk
SHA-256: 51e3b089818a81d957c51e4b2eee67813c76280564e6115b5ff7eae6be26afff
Job: job_f73923ad8abb4b089817bae50bd40c14 ? partial
Risk: medium / 15
Static-analysis completeness: 100%

Evidence-backed findings: 2
- [informational/observed] Sensitive Android permission declared
- [medium/observed] Explicitly exported Android component

Blindspots / unknowns: 6
- NATIVE_CODE_UNINSPECTED: 1 native library file(s) were inventoried but no JNI/native disassembly adapter is configured.
- DYNAMIC_CODE_LOADING_UNRESOLVED: Static strings reference Android class loading, but targets and runtime-loaded code were not resolved.
- REFLECTION_TARGET_UNRESOLVED: Reflection-related strings were observed but dispatch targets cannot be proven from this extractor.
- RUNTIME_OBSERVATION_UNAVAILABLE: No isolated Android runtime lab is configured. No runtime network, filesystem, IPC or behavior observation was made.
- NVIDIA_REASONING_NOT_CONFIGURED: NVIDIA TRI-PROOF reasoning is disabled; no cloud model was called and no AI proposal exists.
- GUARDED_PATH_ANALYSIS_UNSUPPORTED: This MVP has not constructed a resolved DEX control-flow graph for this APK, so it makes no reachability, satisfiability or trigger-witness claim.

This capsule proves consistency of included files, not legal admissibility or safety of the application.
