SHADOWPATH Ω — NEXUS

Evidence-Driven Android Malware Blindspot Discovery & Adaptive Forensic Verification Report

Case Title:	com.skype.rover_v8.15.0.309-release-125000252_Android-4.0.3	**Analysis Status:**	PARTIAL
APK Filename:	com.skype.rover_v8.15.0.309-release-125000252_Android-4.0.3.apk	**Risk Tier / Score:**	LOW (0/100)
SHA-256 Hash:	acfc8964b3e25f92d10ae2ea206a71b5daca417566e2eedf1954673d09fc114d	**Completeness:**	80%
Generated At:	2026-10-25T10:40:20+00:00	**Engine Mode:**	Local Static + Z3 SMT

Evidence-Backed Findings (6)

Rule ID	Severity	Status	Title & Description
SP-APK-001	**INFORMATIONAL**	OBSERVED	**Sensitive Android permission declared** The manifest declares android.permission.ACCESS_FINE_LOCATION. This is an observed declaration, not evidence of malicious use.
SP-APK-001	**INFORMATIONAL**	OBSERVED	**Sensitive Android permission declared** The manifest declares android.permission.READ_CONTACTS. This is an observed declaration, not evidence of malicious use.
SP-APK-001	**INFORMATIONAL**	OBSERVED	**Sensitive Android permission declared** The manifest declares android.permission.READ_SMS. This is an observed declaration, not evidence of malicious use.
SP-APK-001	**INFORMATIONAL**	OBSERVED	**Sensitive Android permission declared** The manifest declares android.permission.RECEIVE_SMS. This is an observed declaration, not evidence of malicious use.
SP-APK-001	**INFORMATIONAL**	OBSERVED	**Sensitive Android permission declared** The manifest declares android.permission.RECORD_AUDIO. This is an observed declaration, not evidence of malicious use.
SP-APK-001	**INFORMATIONAL**	OBSERVED	**Sensitive Android permission declared** The manifest declares android.permission.SYSTEM_ALERT_WINDOW. This is an observed declaration, not evidence of malicious use.

Guarded Paths & Z3 Solver Analysis (0)

No bounded guard predicates satisfied in inspected subset.

Blindspot Ledger & Declared Limitations (5)

Scope	Reason Code	Limitation & Remediation
dex/string-extraction	**DEX_STRING_BUDGET_EXHAUSTED**	Printable-string extraction stopped at the configured per-DEX safety budget; not every embedded string was inspected. *Next step: Retry with an approved higher analysis budget in an isolated environment.*
native/native-libraries	**NATIVE_CODE_UNINSPECTED**	14 native library file(s) were inventoried but no JNI/native disassembly adapter is configured. *Next step: Use an isolated native-analysis workflow and import the resulting provenance.*

dex/reflection	**REFLECTION_TARGET_UNRESOLVED**	Reflection-related strings were observed but dispatch targets cannot be proven from this extractor. *Next step: Use a call-graph adapter that records its resolution assumptions.*
runtime/android-lab	**RUNTIME_OBSERVATION_UNAVAILABLE**	No isolated Android runtime lab is configured. No runtime network, filesystem, IPC or behavior observation was made. *Next step: Configure a disposable emulator/MobSF environment outside the host OS.*
path_analysis/dex-call-graph	**GUARDED_PATH_ANALYSIS_UNSUPPORTED**	This APK did not exhibit bounded guard predicates matching the supported AST subset. Full arbitrary bytecode control-flow slicing is not implemented. *Next step: Run controlled-fixture path evaluator or supply custom guard AST for constraint verification.*

Integrity Guarantee: This capsule proves consistency of included files, not legal admissibility or safety of the application.
